I love games. and I'm interested in game making.

Many games need 3d modeling skills. so I want to learn 3d modeling and texturing.

Although I'm major in electronic engineering, I study hard.

Nowadays art and engineering are mixed, this is very efficient.

And, I want to make 3d movie like toy story, monster company.

I'm poor at art. but I will be mastered at art by this class.
